Handwashing and sanitizing products (Category Code E2): Combination of detergents-germicides (single step preparations designed to combine hand washing and sanitizing) will be considered for registration on the basis of their ability to effectively clean the hands as well as their germicidal equivalency to 50 ppm available chlorine. The hands need not be washed with soap or detergent prior to the use of such preparations. However, the hands must be rinsed with potable water after the use of the product and before handling food.

Hand sanitizing products (Category Code E3): Products manufactured from those solutions described in CFR Title 21, Section 178.1010, which are applicable for the purpose may be used to sanitize the hands of employees handling food products without a subsequent rinse provided they are germicidally equivalent to 50 ppm available chlorine. Products shall not contain perfumes leaving a residual odor on hands after usage. These sanitizing solutions may be used only after thoroughly washing hands with soap or detergent and water, followed by rinsing with potable water. In many instances, these hand sanitizers may be injected directly into wash/rinse water.

BRUTE® UTILITY CONTAINERS

50% EASIER TO LIFT LINERS

THE BRUTE® IS DESIGNED WITH FOUR BUILT-IN VENTING CHANNELS that create airflow throughout the container. This air circulation eliminates the vacuum effect that occurs when lifting out liners in traditional containers. By reducing the pull force required to lift out liners by up to 50%, the BRUTE® improves productivity and reduces the risk of injury when lifting liners out of traditional containers.

Rubbermaid® Commercial Products
HYGEN

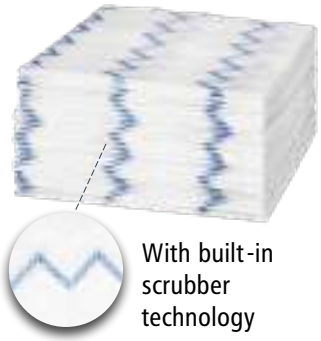

WHY HYGEN™?

KILLING MICROBES DOESN'T MAKE THEM DISAPPEAR.

Traditional disposable products lack scrubbing power, streak and smear, and cannot remove microbes, leaving behind a food source for live pathogens. Rubbermaid HYGEN™ Disposable Microfiber eliminates the food source and combines superior microfiber with built-in scrubber technology, in a disposable application, to prevent cross-transmission and reduce the risk of healthcare-associated infections.

Built-In Scrubbers

Innovative microbe-removing technology is complemented with built-in zigzag scrubbers to effectively remove dirt without streaking or smearing.

With built-in scrubber technology

Dust Mopping

There are several important factors to consider when choosing a dust mop. Use the guidelines on the following pages to choose the best dust mop for your floor care needs.

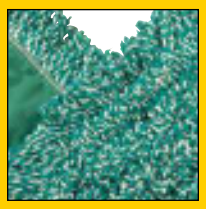

General Dust Mopping

Choose mops with high-dust pickup and durability. If laundering is available, launderable mops will be the most economical choice. Microfiber looped-end and twisted-loop mop heads with reinforced stitching and slip-on/slide-off backing offer the best performance and launderability.

Mop Construction Features

Twisted-Loops
Highly effective at capturing dust and dirt. Premium Twisted-Loops are less prone to snags, frays, and unraveling during cleaning and laundering.

Looped Ends
Reduce fraying and deplying for better durability and longer product life. More effective than cut-end mops.

Cut Ends
Economical construction for general-purpose dusting.

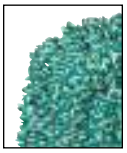

Reinforced Stitching
Reinforced, double-needle stitching at key "wear" points increases product life.

Backing Design
Slip-on/slide-off backing allows quick, easy setup for standard or breakdown mop frames.

Launderability

The launderability of a mop is based on the number of commercial washing and drying cycles. It can withstand before the construction of the mop is degraded or the performance declines. Microfiber, synthetic, and blended fiber mops have the highest levels of launderability.

Durability

The durability of a mop is a measure of how long it will perform before needing to be replaced. Microfiber, synthetic, and blended fiber mops are the most durable.

Mops with **antimicrobial fibers** have greater durability because they inhibit the bacterial growth that causes mop odor and discoloration.

Dust Pickup

Dust pickup is the ability of a mop to remove dust and dirt from the floor surface. Microfiber, blended fiber, and synthetic mops have the highest degree of dust pickup.

BROOM AND BRUSH CONSTRUCTION

Surface textures and types of dirt vary throughout a facility, so choosing the correct broom and brush construction is important for maximum cleaning effectiveness. Rubbermaid Commercial Products' brooms and brushes offer a complete range of blocks and fill types to clean virtually any surface.

BLOCK STRUCTURES

STRUCTURAL FOAM BLOCK
Resists cracking, splitting, warping, and rotting. Helps prevent bacteria growth. Two threaded holes provide long product life.

WOOD BLOCK
A classic look that resists moisture and helps prevent cracking. Two threaded holes provide long product life.

BLOCK AND FILL DESIGN
Staggered hole pattern prevents gaps in fill material for better performance. Dense fill leads to longer brush life. Flagged tips pick up fine dust and dirt particles. Flared ends allow access to corners.

FILL—NATURAL

HORSEHAIR
Very durable with a naturally flagged tip; good shear/break resistance. Will not scratch smooth or highly polished surfaces. Not for use on oily or wet surfaces.

PALMYRA
Medium to highly stiff fiber from the Palmyra Palm provides durability and good bristle recovery. Can be used wet or dry.

TAMPICO
Soft to medium stiff fiber from the Agave plant. Durable and retains shape after continual use. High resistance to heat, alkali, solvents, and acid. Can be used wet or dry.

FILL—SYNTHETIC

NYLON
Very durable with excellent abrasion resistance, shear/break strength, and bristle bend recovery. Will not stain, discolor, or absorb odors. Can be used wet or dry and resistant to alkalis and most solvents.

POLYSTYRENE
Extremely durable. Excellent bristle bend recovery and shear/break strength. Resistant to water, oils, and solvents. Not for sweeping compounds or oily surfaces.

POLYPROPYLENE
Very durable with good abrasion resistance and shear/break strength. Will not stain, discolor, or absorb odors. Resistant to solvents, acids, oils, fungus, and bacteria growth. Can be used wet or dry.

FILL—WIRE/METAL

BRASS
Provides a high degree of abrasion without severely scratching hard surfaces. Will not rust. Best for heavy cleaning of metal or brick surfaces that cannot sustain heavy scratches.

STAINLESS STEEL
Provides a high degree of abrasion and wear resistance. Resists chemicals and rust. Excellent bend recovery. Best for aggressively removing residue from metal or other resilient materials.

TEMPERED STEEL
Provides a high degree of abrasion and wear resistance. Good bend recovery. Best for aggressively removing residue from metal parts or brick work.

A NEW STANDARD OF EXCELLENCE IN HEAVY-DUTY PLATFORM TRUCKS, BULK TRUCKS, AND CARTS

We've significantly redesigned and expanded our material handling line with new categories, new products, and new innovations that help you work smarter, faster, and safer.

DURAMOLD™ REAL WORLD RUGGED — TESTED TOUGH

Rubbermaid's exclusive Duramold™ technology exceeds the highest performance standards in the industry. We test and retest our products to meet rigorous durability standards, and our new material handling products are no exception. Real-world rugged durability, innovative technology, and best-in-class features combine to create longer-lasting products that carry heavy loads—and make your work easier.

DURAMOLD™
precision-engineered resin and steel composite decks
HOLD & TRANSPORT UP TO

2500 lbs.

of weight load capacity

40 buckets of sheetrock compound weigh over 2,400 lbs—that's a load!

Duramold™ decks are formed from a precision-engineered resin and metal composite structure that is lighter than typical steel/wood products without sacrificing strength, which enables weight reduction and improved ergonomics.

WILL NOT WARP, DENT, SPLINTER, RUST, OR ROT

Tough, resilient surface absorbs impact and provides quiet operation. Virtually maintenance-free; resistant to most chemicals, impervious to water damage, and easily cleaned.

Metal—dents and rusts

Wood—splinters and rots

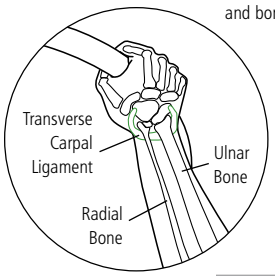

MOVE LOADS SAFELY AND EFFICIENTLY

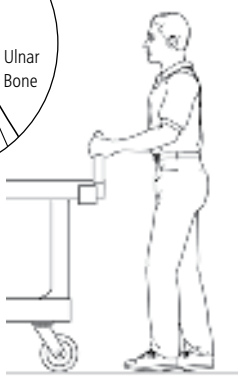

The variable grip-height handle on our carts and trucks improves maneuverability and reduces muscle strain for most every user, regardless of height.

TRADITIONAL CART HANDLE DESIGN

Angled handle helps keep wrist and bones in forearm aligned for optimum leverage while turning.

IMPROVED VARIABLE GRIP-HEIGHT HANDLE

PUT YOUR EFFORT INTO MOVING YOUR PAYLOAD, NOT YOUR TRUCK

DURAMOLD™ HAS THE HIGHEST STRENGTH-TO-WEIGHT RATIO

when compared to metal, wood, and solid plastic decks.

35%

lighter weight construction to transport the same payload

Duramold™ resin and metal composite structure is recyclable.

Convertible A-Frame Truck

Our unique design combines the bulk load capacity of standard panel trucks and bar stock trucks with the functionality of a heavy-duty two-shelf cart. Saves time and money by transporting oversized, heavy loads to your worksite in one trip.

CASTERS TO MEET YOUR NEEDS

Rubbermaid's best-in-class heavy-duty casters have been specially chosen for each of our products to meet your most demanding environments.

POLYOLEFIN
Hard-tread polyolefin casters roll easier than soft tread casters. Nonmarking, impact- and chemical-resistant casters won't flat-spot under static loads or pick up metal shavings, nails, and other debris.

PNEUMATIC
Pneumatic casters provide a cushioned and quiet ride for fragile loads, making them ideal for rough and uneven surfaces, inside and out.

THERMOPLASTIC RUBBER (TPR)
TPR casters absorb shock and provide floor surface protection and quiet operation. Chemical- and water-resistant.

INTRODUCING A REVOLUTIONARY GREEN ENERGY SYSTEM THAT TRANSFORMS LIGHT INTO POWER

LumeCel™ captures energy from regular indoor lighting

Like a solar panel capturing energy from the sun, LumeCel™ captures energy from any indoor light source.

1 = 30*

One LumeCel™ Rechargeable Energy Cell will last as long as 30 conventional alkaline batteries.

*based on typical dispenser settings

LumeCel™ is Smart

LumeCel™'s rechargeable energy cells are made from fully recyclable nickel metal hydride technology. Super efficient, they store energy from light, providing internal electrical power at nearly 100% efficiency. Easy to use, ready for use, right out of the box.

LumeCel™ is Clean

LumeCel™'s revolutionary green energy system is the cleanest, best choice for the environment. It's 100% recyclable and eliminates the need to manufacture, use and dispose of alkaline batteries. This equals no continual landfill or toxic alkaline battery disposal fees, minimal environmental impact and a higher LEED certification.

LumeCel™ saves time and money

Staff will no longer need to purchase, store, replace and dispose of batteries. LumeCel™ is also virtually maintenance-free, reducing the potential of workplace mishaps or accidents.

LumeCel™ lasts for years and years

This globally-patented revolutionary green energy system is completely self-powered and guaranteed to run automatically for at least 15 years.

550 million

pounds of alkaline and lithium batteries go into landfills, globally, every year. With LumeCel™, you're no longer a contributor to this waste stream.

TCell™ 2.0 Advantage

Patented Fuel Cell Technology

TCell™ 2.0's patented fuel cell technology allows for the creation of hydrogen directly in the device's formula chamber. As each molecule of hydrogen is created, it forces an equal amount of odor neutralizer out of the chamber. From there, natural airflow distributes the fragrance and odor neutralizer throughout the space, covering up to 6,000 cubic feet.

- Silent operation
- Battery-free operation
- Eco-friendly / no harmful emissions
- A cost-effective air care solution

Preferred Fragrances

RCP offers a variety of clean, fresh fragrances representing consumer-preferred fragrance zones, increasing satisfaction with individual patrons. Top fragrances are offered as individual products or in convenient Preference Packs.

All TCell™ 2.0 fragrances include Microtrans™, a total odor neutralizer. Odors are not simply masked, but are eliminated completely.

TCell™ 2.0 fragrances last either 30 or 45 days, depending upon the selected dispenser setting, providing flexibility to meet the needs of each and every space.

LIDS FOR EVERY NEED

1 SECURE-SEALING LID

Two-seal system makes this lid the most airtight of all the Rubbermaid options and is ideal for longer-term storage or air-sensitive foods. Easy-grip tab allows for easy removal of the lid from the pan.

2 PEG HOLE COVER WITH HANDLE

Peg hole allows pan to be hung and dry faster, helping to prevent health risks from standing water. Rubbermaid's peg hole solution is the only NSF-certified hanging solution on the market.

3 NOTCHED COVER WITH HANDLE

NSF-certified notch allows spoon to be easily available while food remains covered. Notch keeps spoon handle out of food, complying with FDA Food Code.

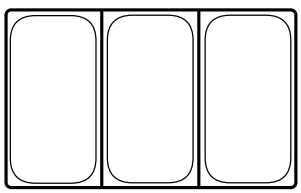

4 SOFT-SEALING LID

Seals on insert pan help reduce airflow to food, therefore maintaining food quality. No overlap on food pans allows easy use in transport.

5 FLIP LID

Flip lids allow easy access to pan contents without having to remove the entire lid. Available in both notched and solid versions.

***DESIGNED TO EN 631-1 C.E.N. STANDARD**

Developed by the European Committee for Standardization and based on a gastronorm modular system, ensures compatibility of the pans with other kitchen equipment.

**Oven-safe up to 375°F (191°C).
